PROFESSIONAL SUMMARY

Results-driven Frontend Developer with 2+ years of experience engineering high-performance, responsive, and scalable web applications using **React.js**, **Next.js**, **TypeScript**, and JavaScript (ES6+). Experienced in client and server-side state management (**TanStack Query**, **Zustand**, **Redux Toolkit**, **Context API**), RESTful API integration, UI/UX optimization, and internationalization (**nextIntl / i18n**). Experienced in building performant and maintainable frontend applications with modern React best practices, and adhering to **DRY** principles to deliver seamless digital experiences.

WORK EXPERIENCE

Frontend Developer (Project-based) Oct *2024 – Nov 2025*

FindTech *- United Arab Emirates, Remote*

- Developed responsive and maintainable web applications using React.js, JavaScript, Tailwind CSS, and Bootstrap.
- Integrated REST APIs using Axios and React Query to improve data synchronization and reduce unnecessary network requests.
- Implemented React Query caching strategies to improve application responsiveness and optimize API performance.
- Developed reusable React components and Custom Hooks to reduce code duplication and improve maintainability.
- Utilized Zustand and Context API to manage and share application state across multiple components efficiently.
- Improved frontend performance by minimizing unnecessary re-renders and optimizing component architecture.
- Collaborated with project stakeholders to translate business requirements into production-ready solutions.
- Participated in debugging, testing, and resolving frontend issues across different browsers and devices.

Frontend Developer (Freelance & Professional Development) *Jun 2022 – Present*

- Developed multiple frontend applications using React.js and Next.js, including e-commerce platforms, management systems, and corporate websites.
- Built production-ready websites for local clients with a strong focus on responsive design, SEO, and maintainable component architecture.
- Currently architecting and developing a **Mini ERP System** using Next.js App Router, Server Components, dynamic routing, and modern rendering strategies.
- Completed hands-on training in **Python**, **Linux**, and **PostgreSQL** to strengthen backend and deployment fundamentals.
- Learned **Odoo ERP development**, including creating custom modules, models, views, security rules, and basic business workflows to understand enterprise application architecture.
- Continuously expanded expertise through practical projects using **TypeScript**, **TanStack Query**, **Zustand**, **Redux Toolkit**, and REST API integration.

PROJECT EXPERIENCE

Matjrey – Mini ERP System (In Progress):

A modern ERP web application currently under active development, designed to manage business operations through a scalable and responsive interface. The project includes data-driven dashboards, finance tracking, inventory management, administrative workflows, and reusable UI architecture. Built with **Next.js (App Router), TypeScript, Tailwind CSS, and Zustand**, with REST API integration and Prisma-based backend planned for the next development phase.
Demo: https://matjrey.vercel.app/

Aura Secure – Corporate Website

Built a bilingual (Arabic/English) corporate website with RTL/LTR layout switching using Next.js, React.js, and Tailwind CSS. Implemented advanced SEO metadata, Open Graph tags, and schema structure.
Demo: orasecure.com.sa

Sudatech – Shop :

Engineered a shopping interface featuring live filtering, search, wishlist, and cart state management via Zustand and efficient server state management using React Query.
Demo: https://sudatech-shop.vercel.app/

Villans – Hotel Booking :

Implemented JWT authentication, interactive location filtering via OpenStreetMaps API, and Redux Toolkit state management for seamless reservations.
Demo: https://qassim8.github.io/villans/

Zus Ecommerce :

- Displayed products from an API with search functionality.
- Enabled users to add products to a wishlist and cart, with options to delete items.
- Tools and Techniques: HTML, CSS, JavaScript, Bootstrap CSS, ReactJS, Context API.
  Demo: https://zus.vercel.app/

PROFESSIONAL SKILLS

Technical Skills:

- **Languages: JavaScript (ES6+), TypeScript, Python**.
- **Frameworks: React, Next, Odoo, Bootstrap, Tailwindcss**.
- **State Management: Context API, Zustand, ReduxToolKit, TanStack Query**.
- **Frontend Concepts: Custom Hooks, Component Reusability, Performance Optimization, Code Splitting, DRY Principles**.
- **Tools: Git, GitHub, Axios, Vite, npm**.

Soft Skills:

- Team-oriented with a **proactive approach** to project challenges.
- Ability to **solve problems efficiently** and adapt to new technologies quickly.
- Strong **communication** and collaboration in cross-functional teams.

EDUCATION

Bachelor of Science in Computer Science & Information Technology – Information System *March - 2023*
Al-zaiem Al-Azhari University

LANGUAGE COMPETENCIES

- **Arabic** (Native / Fluent).
- **English** (Intermediate B1).
